

Guide to affixing Lynn University parking sticker

Bar-coded parking stickers must be applied carefully to avoid air bubbles and to ensure that the scanners can read them. Please review the following instructions carefully before affixing the stickers to your vehicle.

1. Clean the window prior to affixing the sticker (use a non-scratch, mild abrasive cleaner).
2. Place sticker on the bottom, rear driver's side window. (Windows that do not open are preferable).
3. Apply to the outside of the window glass. (The bar code will not read reliably through glass.)
4. Affix the sticker as straight up and down as possible, with the stripes running horizontally and the numbers toward the rear of the vehicle (as shown).

Note: If you already have a barcode sticker (corresponding to another gate system) on the same location of your vehicle, please affix your Lynn parking sticker to the left or right of your existing sticker.

Applying the parking sticker

1. Peel backing from the top of the sticker about one inch.
2. Line up decal per Step 4 above, then press top of sticker against the glass.

3. Continue to apply the sticker. Slowly pull backing off as you run your fingers (or a credit card or flat surface) over to smooth the sticker down until the backing comes off.
